

FOR THE WHOLE TEAM

Your front desk should not have to choose between helping the person in front of them and chasing the answer behind the claim.

REVENUE SUPPORT FOR DENTAL PRACTICES

START WITH THE WORKFLOW

Show us where the handoff breaks.

Old balances, insurance follow-up, missing information or repeated rework—we begin with the problem your team can describe.

FOR DENTAL PRACTICES

BEST FOR · DENTAL OWNERS AND OFFICE TEAMS

Your team should be helping patients —not hunting for one missing answer.

Human + AI revenue support that starts with the work already slowing your practice down.

RECOVER · SIMPLIFY · LEARN

Keep your current people. Give the hard work a clearer owner.

OUTSIDE · FRONT COVER

One missing detail can travel a long way.

Coverage questions, documentation, coding, claim submission and insurance follow-up are separate tasks—but they land on the same financial outcome.

- Information collected before treatment
- Documentation and coding support
- Claim edits, submission and payer response
- Outstanding insurance and patient balances
- Recurring issues returned to the earlier step

SmartMBX does not assume every dental practice has the same problem. We map your actual workflow first.

Choose the outcome—not the buzzword.

OLD **A/R Recovery:** focused work on eligible aged claims at a flat 10% of revenue recovered.

TIME **AI Billing Assistant:** approved knowledge and preparation support for repetitive team questions.

FLOW **IRIS workflow:** explore a clearer view from relevant information to human-owned next action.

TEAM **Full RCM support:** scope the operating work your practice needs carried.

Bring one problem to the Revenue Health Check.

We will help you identify the smallest sensible next step.

- ✓ Keep your existing EHR unless the agreed workflow requires otherwise
- ✓ Keep your existing team when focused support is enough
- ✓ Put privacy and approved access in place before real data
- ✓ Keep human judgment responsible for consequential actions
