FOR HOME HEALTH TEAMS

BEST FOR · HOME HEALTH AGENCIES

Every handoff matters. Your revenue should not disappear between them.

Human + AI support for making work visible, organized and owned across the revenue cycle.

FROM SCATTERED SIGNALS TO A CLEARER NEXT STEP

Revenue depends on information moving with the care.

Home health workflows cross people, documents, schedules, coverage and billing steps. When one required item is late or ownership is unclear, the financial work can wait behind it.

The useful question is not only “Who denied it?”

- Where did the needed information begin?
- Who knew it was missing?
- Who owned the next action?
- Was the outcome sent back to the source?

SmartMBX starts by learning the agency’s actual systems, responsibilities and approved workflow.

Make the work easier to see and prepare.

SEE Bring relevant authorized signals into the work context.

SORT Organize items by urgency, missing information and owner.

PREP Prepare a checklist, summary or next question for review.

OWN Keep a knowledgeable person responsible for the action.

LEARN Return recurring issues to the touchpoint that can improve.

Recover, assist or redesign one workflow.

- ✓ A/R Recovery: flat 10% of eligible revenue recovered from aged claims 90–120+ days
- ✓ AI Billing Assistant: practice-specific support from \$299 per assistant / month
- ✓ SMBX IRIS: a scoped workflow pilot based on authorized systems
- ✓ Full revenue-cycle support: an agreed operating scope
